COMPANY OVERVIEW

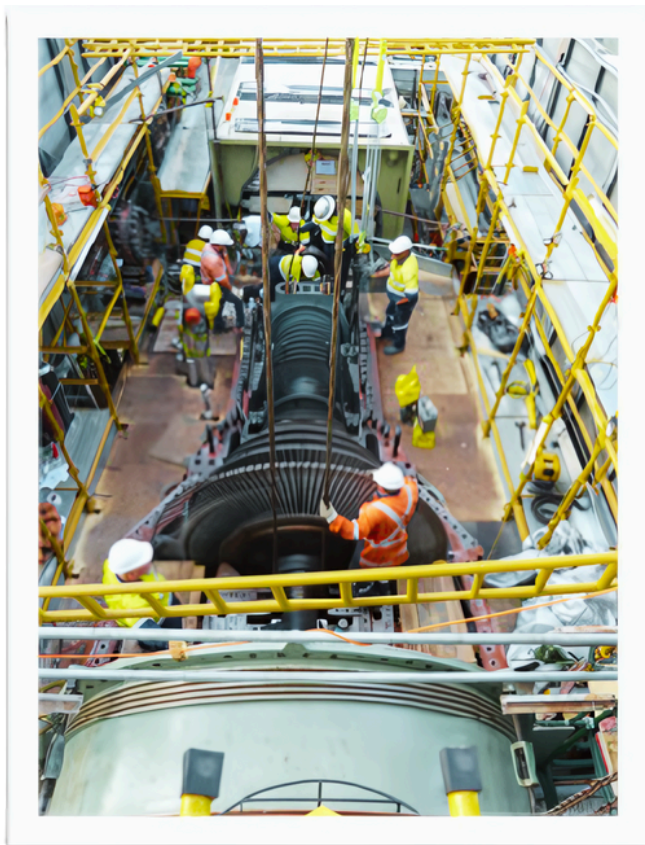

BK Industrial Group is an Australian owned company delivering mechanical engineering and fabrication and pressure welding solutions to Power Generation Industry, mining and Food Manufacturing sectors for over 25 years throughout Australia.

BK Industrial Group pride Whilst on providing solutions for clients through experienced specialised technicians, with years of both onsite and workshop capabilities. BK Industrial Group specialise in problem solving and provides working solutions to enable client's facilities and production requirements to work efficiently both in cost, output and minimise environmental impact.

We have workshops located in both Ingleburn in NSW and Port Hedland in WA, to complement project teams and fly in fly out crews that support our clients throughout Australia.

We appreciate that no two jobs are the same as no two clients are ever the same.

BK Industrial Group offer the whole package when it comes to Mechanical and Process Engineering.

VALUES

BK Industrial Group's Values

- Integrity, in all we do, ethically, clearly and based on trust
- Safety for our people, clients, community and the environment
- Stakeholder satisfaction through solid work practices, resulting in long-term partnerships
- Investing in our People and technology
- A passion for mechanical engineering innovations and practices

OUR VISION

Our vision is to develop and foster long-term partnerships with our clients, vendors, and employees to provide valued processes and mechanical engineering solutions through solid work practices, that are safe, effective and environmentally focused.

MISSION STATEMENT

BK Industrial Group Pty Ltd are committed to being the trusted business partner, working with our clients by providing cost effective, safe and innovative engineering solutions to assist in their production targets.

OUR WHY

Providing solutions to clients through experienced and specialised technicians, with years of both onsite and workshop capabilities through problem solving and working solutions to enable client's facilities and production goals to work efficiently cost wise, output and minimise environmental impact.

OUR BACKGROUND

BK Industrial Group Pty Ltd was established in 1996 by Brett and Kylie Wiseman.

Previously known as BrettKye Engineering Pty Ltd, the company changed its name, in 2011, to reflect our focus of not only servicing our clients in the power generation and food industries across Sydney, but Australia wide.

Moving to a larger workshop, located in Ingleburn, south west of Sydney, providing fabrication, machining, process engineering, shutdown services and mechanical maintenance, throughout the Sydney region. The Ingleburn facility provides fabrication support to our FIFO teams in various locations around Australia.

In 2022, after 10 years of FIFO services, BK Industrial Group have expanded into the Pilbara Region, with our Service Centre in Wedgefield supporting local Power Generation and mining facilities.

BK Industrial Group pride ourselves on providing customised services that achieve the following:

- By working with our clients, we clearly identify needs, outcomes, and objectives by providing solutions to enable performance targets.
- We scope, manage, and execute work in a cost- and time-effective manner while providing practical working solutions.
- We utilise our talented skills base of focused, competent, and dedicated personnel.
- We invest in people and machinery to achieve outcomes that are the most cost-effective without compromising safety.
- We maintain a flexible, amicable, and professional approach with our clients.
- We work ethically, environmentally responsibly, and follow Safe Work Practices.
- We encourage and mentor our staff and the next generation of mechanical engineers.

MANAGEMENT SYSTEMS

BK Industrial Group have an Intergrated Management system that is at the centre of the business. For us, as a business, quality, health and safety and the environment is not just a sticker, but the way we improve, monitor and grow.

Since 2019, BK Industrial Group are triple ISO certified in:
ISO 9001
ISO 45001
ISO 10001

SAFETY FIRST

BK Industrial Group the safety of our employees, clients and surrounds always comes first. We are proud of our safety record, with zero LTI's both within our workshop and on site.

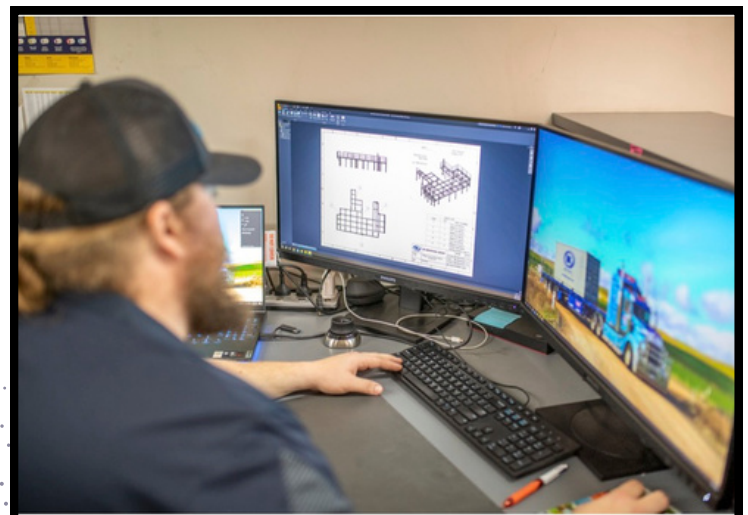

This is achieved through our comprehensive approach to safety, ensuring all our staff are aware of risks and actively complete Take 5s, preparation of site SWMS and attend pre-starts and regular safety sessions.

We have a Health and Safety Policy, and Health and Safety Management System which forms part of our Integrated Management System. This comprehensive approach to safety and quality ensures all state and federal legislative obligations and the requirements of ISO 45001 are met.

OUR PEOPLE

All of our team members are fully qualified in their trade, with additional tickets such as confined space, working at heights, and forklift to add to their skillset. We believe mentoring is essential in passing on skillset. Investing in up-skilling and providing apprentices support as they navigate there way through their trade.

We have a diverse group of subcontractors that we utilise, who are professional and hold specialised skills when called upon.

POWER GENERATION, MINING AND WATER

Our experience within the Power and Water fields ranges from many different sites across Australia.

Western Australia: Port Hedland Power Station, Roy Hill, Newman Power Station, Boodarie Power Station, Collie Power Station, Pinjar Power Station, Wagerup Power Station.

South Australia: Quarantine Power Station, Hallet Power Station, Ladbroke Grove Power Station.

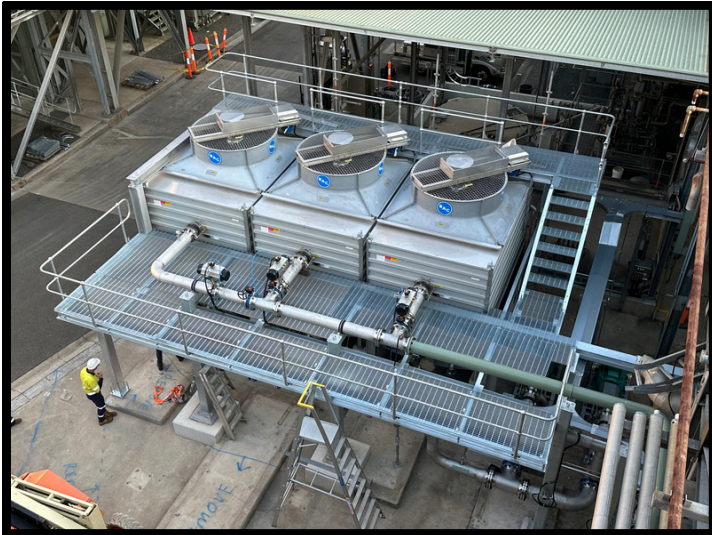

Northern Territory: Gove Power Station.

New South Wales: Smithfield Power, Tallawarra Power, Lucas Heights Power Station, Tahmoor Power Station, Sydney Water.

Scope of works are wide and varied, and include works with exotic materials such as chrome moly, high pressure steam piping and high temperature stainless steel alloys and also insulation and cladding works.

Examples of works include:

- Vessel installation and tie ins
- Process piping for fuel such as air, coolant, oil.
- Process piping for high pressure steam
- Process piping for waste stream disposal
- Maintenance, – preventative and reactive
- Insulation and cladding works
- Tanks, tank roofs and silos
- Plate and structural steel fabrication
- Servicing pumps, valves and gearboxes
- Fabrication custom one-off projects
- Turbine Overhauls
- Mechanical Overhauls
- Valve Maintenance
- Maintenance Inspections

FOOD INDUSTRIES

BK Industrial Group having over 30 years experience on a wide variety Food production facilities in different locations around Australia. With extensive knowledge and capabilities in project management, emergency breakdown, preventative maintenance, audits and scheduled servicing. We understand the importance of having your plant running efficiently, to prevent costly downtimes that disrupts your production and supply schedules.

We also understand that maintenance on production lines is not just Monday to Friday 7 til 4, but after 'normal' hours, weekends, and public holidays.

Clients: Coca Cola, Real Pet Foods, Asahi, Nutrisoy, Goodman Fielder

- Ovens, Dryers & Coolers
- Conveyors
- Chutes / Hoppers
- Piping
- Project Management
- 24/7 Emergency breakdown support
- Plant Maintenance for OHS Audit Inspections
- New Component Fabrication
- Efficiency and Hygiene Improvement
- Maintenance and Refurbishments
- Assembly and Equipment Upgrades
- Minor and Major Factory Shutdowns
- Decommissioning

LABOUR HIRE SECTOR

BK Industrial Group P/L ventured into the recruitment sector in 2021 with the launch of our Port Hedland location. Since the beginning of our Labour Hire division, BK has developed strong relationships with both large and small enterprises throughout Australia.

Our close partnership with BHP, facilitated by local engagement, enabled us to enter the mining industry, resulting in the successful placement of numerous candidates in diverse roles within this sector. BK Industrial Group have long-term working relationships within the Energy and Food production industries. Working together with GE/Fieldcore, APA (Alinta) for over 20 years and Kellogg, Arnotts, Asahi in the Food Industry.

INDUSTRIES WE SERVE

BK Industrial Group pride ourselves on having open solid working relationships with our clients. Whilst nurturing long standing relationships we work strongly in forging solid connections with new clients. We are the one stop shop when it comes to customised engineering and maintenance services.

CAPABILITIES

ENGINEERING

BK Industrial Group is a customised, full service, one-stop, custom drafting, manufacture and install high quality fabricated metal products, are highly skilled in repairs and overhauls and provide professional personnel for onsite services.

2D & 3D DRAFTING

We have qualified staff who provide our clients with planning drawings through to complete drawings for fabrication of our own in-house designed equipment.

GENERAL ENGINEERING AND MACHINING SERVICES

BK Industrial Group offers our clients a diverse range of machining, fabrication, welding and reverse engineering services. In particular we have developed a strong reputation of maintaining and managing rotatable assets including pumps, valves and gearboxes. With expert fitting capabilities to meet basic through to complex requirements and can produce an extensive range of products and specialised components.

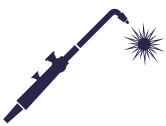

BOILERMAKING, FABRICATION AND SHEETMETAL SERVICES

Fabrication and welding of boilers and pressure vessels for use in industries such as power generation, petrochemicals, and manufacturing engineered to Australian Standards. In addition to our water jet we offer sheet metal services from the design stage through to folding and supplying a finished product.

PUMPS, VALVES AND GEARBOXES

Rebuilding existing hardware to optimum output along with sourcing new and refurbished pumps, valves, gearboxes

PRESSURE WELDING

Our team of qualified pressure welders have extensive experience in gas, energy, manufacturing, food and beverage industries. Assemblies, welds and repair of pressure vessels and pipes, all to which meet and exceed the relevant standards and codes.

MECHANICAL AND FIELD SERVICES

Maintenance, repair, and installation of systems and equipment such as pipelines, turbines, and machinery.

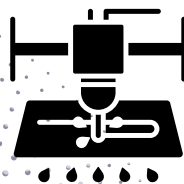

SHUTDOWN SERVICES

Shutdown services from start to finish. From site walk downs, through the rebuild, overhaul to essential client specific reports.

LABOUR HIRE

BK Industrial Group have a team of skilled trades people with extensive site knowledge. From trade assistants, riggers to pressure welders including all trades people. We can recruit for any role to suit your needs including office support and engineers.

WATERJET CUTTING

One of the most efficient and versatile profile cutting solutions used in industry today. Key capabilities

- Ability to cut 5 axis
- Plates from 0.2 to 100mm thick with high quality finish
- 4mx2m working area

OUR FACILITIES

INGLEBURN

Workshop facilities servicing Sydney and surrounding suburbs. Ingleburn is located South of Sydney, with close access to M5 corridor.

- Material specialists in carbon steel, stainless steel, alloys and plastics
- 20ft Tooling/mobile workshop container hire
- 260t press brake
- Guillotining / folding
- Orbital Welding
- WaterJet - 5 axis
- Machining - turning, milling, boring and slotting
- Boilermaking and pipe fitting
- Mobile Servicing Trucks

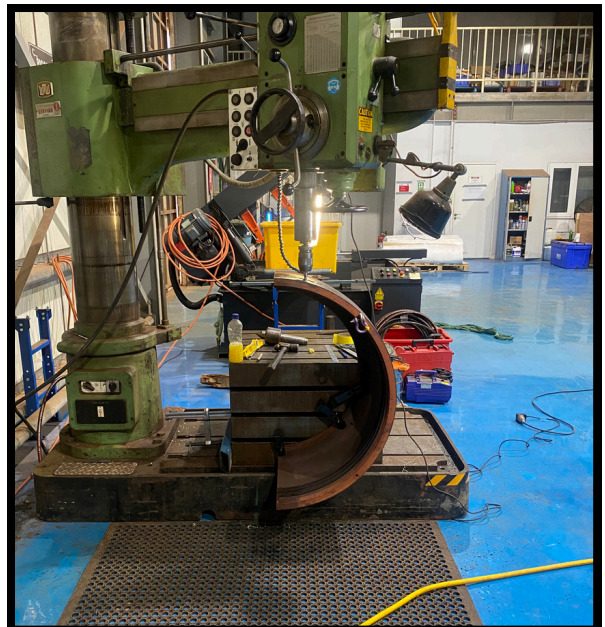

PORT HEDLAND

BK Industrial Group's workshop facilities servicing Port Hedland, the Pilbara, surrounds and the west coast of Australia. Whilst the workshop provides fabrication services, our labour teams is based here to support not only local Port Hedland businesses but throughout the region and beyond.

Workshop capabilities

- Material specialists in Carbon steel, stainless steel, alloys and plastics
- 20ft Tooling / workshop container hire
- Cutting and welding capabilities
- Machining - turning, milling, boring and slotting
- Pressure testing, NDT's and comprehensive MDR's upon request
